Computing.   Dec-2014

Experience

iCorp   San Juan del rio, Qro.

On-Site Engineer   April 2021 – August 2021
- I performed preventive and corrective maintenance to computer equipment, ensuring its optimal operation and prolonging its useful life.
- Led the implementation of a periodic information backup program, ensuring the security of critical data and rapid recovery in case of failures
- Uploaded and configured user profiles for new employees, facilitating their integration and access to the necessary tools and resources.
- I collaborated with the IT team to implement improvements in the technological infrastructure and participated in the successful migration to a new version of security software.

Mitsubishi Electric   San Juan del Rio, Qro.
Intern   January 2020 – August 2020
- Designed and developed a custom system using PHP and MySQL to process XML files generated by other software and extract the list of parts and components.
- I used specific libraries and functions for XML manipulation, ensuring accurate data extraction and storage in the MySQL database.
- I implemented a control panel that allowed users to load and analyze XML files, as well as view and manage the list of parts associated with each elevator.
- I collaborated with the internal team to ensure that the solution met the specific requirements and needs.

Toscana   San Juna del Rio, Qro
Web Developer   November-2019
- I designed and developed a complete website for Pastelería La Toscana using HTML, CSS and JavaScript.
- Deploy a virtual assistant with IBM Watson AI tools
- I worked closely with the pastry team to understand their needs and vision, creating an attractive and functional design that reflected the brand's identity.
